

Early in these videos I say that I will be encrypting
0000 1111 0000 1111, but I lost a couple of 1's in my head
and instead encrypted 0000 1111 0000 11. That was a goof. Sorry.

The examples are correct for encrypting 0000 1111 0000 11
